Skills

Java
1 year experience with java 17+
■ ■ ■ □ □

Spring boot
Created robust backend apis
■ ■ ■ □ □

Javascript
2 years of creating custom ui's
■ ■ ■ ■ □

React
1.5 years of experience
■ ■ ■ □ □

Next js
1 year of creating full stack apps with next js
■ ■ ■ □ □

MySQL
Worked with relational dbs
■ ■ □ □ □

MongoDB
To develop understanding of non-relational dbs
■ ■ □ □ □

Python
1 year of automation experience
■ ■ ■ ■ □

Interests

Coding
Tech Nerd

Gym
Helps with discipline, Patience and critical thinking

Reading books
Cope with loneliness

Languages
English
Fluent in English
■ ■ ■ ■ □

Urdu
Mother Tongue
■ ■ ■ ■ □

Summary

Full-Stack Developer skilled in building scalable web applications using **React**, **Next.js**, **Node.js**, **Java**, and **Spring Boot**. Experienced in developing both **monolithic** and **microservices** architectures, designing REST APIs, and implementing secure, high-performance backend systems. Proficient with **MongoDB**, **PostgreSQL**, **Redis**, and **Docker**, with hands-on experience building **Git** and **Redis clones** to deepen systems-level understanding. Delivered production-ready solutions including an e-commerce backend, job application platform, and a real **client hospitality system**. Focused on clean architecture, performance optimization, and end-to-end product delivery.

Experience

Cortexis Solutions	August to September 2025
Full Stack Developer Intern	Remote

Education

Comsats University Islamabad	February 2023–present
Computer Science	BS
3.32	

Projects

- E-commerce Backend(Monolithic Architecture)**
Developed a scalable monolithic backend supporting product catalogs, user authentication, inventory, orders, and payments.
REST API • authentication • RBAC • transactions • payment integration • SQL optimization • backend architecture
- Job Application Platform (Microservices Architecture)**
Built a microservice-driven job platform with independent services for users, jobs, applications, and notifications.
microservices • API gateway • service discovery • message queues • containerization • distributed backend
- Hostel Management System**
Delivered a production hostel management system with room allocation, tenant tracking, payments, and automated admin workflows. Built for a real client, emphasizing reliability and clean operational flow.
client project • admin dashboard • CRUD operations • workflow automation • payment tracking • production deployment
- Redis Clone**
Built a lightweight Redis-inspired datastore supporting key/value pairs, TTL expiration, pub/sub, and command parsing.
in-memory storage • TTL cache • pub/sub • command parser • low-latency IO • high-performance systems

Volunteering

Computer Science Society	February 2025–present
Head of Marketing
